Box No. V **Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

1. Statement

Novelty (N)	Claims	<u>1-41</u>	YES
	Claims	_____	NO
Inventive step (IS)	Claims	<u>1-41</u>	YES
	Claims	_____	NO
Industrial applicability (IA)	Claims	<u>1-41</u>	YES

2. Citations and explanations (Rule 70.7)The claimed invention

The claimed invention relates to a method and a system for routing a message or a set of messages or a session from a first equipment connected or registered to a first network, to a second equipment connected or registered to a second network.

The claims have been amended.

The following document were cited in the International Search Report:

D1: WO 9911087 A2
 D2: WO 0243405 A1
 D3: WO 0079825 A1

D1 relates to a method and a system for processing calls for communication equipment with a subscriber number ported from a first operator to a second operator. D1 describes on page 2 lines 4-23 that each communication network forms a database of ported (routed) numbers. The database is accessible from at least one gateway exchange and the subscriber numbers ported from one operator to another are stored together with information about the network to which the subscriber numbers belong. Upon an incoming call (setup request), the called subscriber number is compared with the subscriber numbers in the database; and on the basis of the result of that comparison, routing information for the further processing of the call is composed.

However, D1 does not describe a message requirements check for deciding on the routing, nor does D1 describe a release of a session based on the check result.
